

## Conservation RQ - 8

Conservation for an ecosystem is when \_\_\_\_\_.

Conservation for ecosystems is important because \_\_\_\_\_

\_\_\_\_\_.

One ecosystem that needs protecting is the grasslands. One major threat to the grasslands is over farming. The grassland soil is good for growing food, so many farmers plow the land to plant crops (more information). When people change the grasslands by farming, wild animals have a harder time finding food (importance). If we did nothing the results would be \_\_\_\_\_.

(Why would it be bad for the ecosystem if we did nothing? Two sentences).

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

To keep the grasslands from being destroyed, there are many things we can do to protect the ecosystem. (How can we protect the ecosystem? Three sentences).

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

The grassland ecosystem is home to many amazing plants and animals and if we don't help conservation efforts of this ecosystem, we lose a wonderful treasure to this plant.
